### A REMARKABLE FEAT.

Performed by the Champion Swimmer of Australia.

He Swims Across the Golden Gate at San Francisco in One Hour and Fifteen Minutes Against the Tide.

The most important feat in swimming in the history of the coast was accomplished recently by Charles Cavill, be champion swimmer of Australia. Cavill managed to breast tides and currents between Fort Point and the Marin county shore and swam across the lolden Gate. It was 3:30 o'clock when Cavill left Devil's Point, and just 1 your and 15 minutes later he touched the rocks about 200 yards seaward from Fort Winfield Scott, having covered a distance, as the crow flies, of ever 11 miles

The Australian's performance drew a g crowd. The shore about Fort Point as lined with people and the waters in he gate were erowiled with small craft f every description. The ferryboat ausalito had a place in the stream ith almost a thousand people aboard From a swimmer's standpoint the day vas an ideal one. The water was as mooth as could be desired, its surface ally rippled by the curling edges of the ong swells that eame from the ocean. There was a slight wind blowing, but it vas not strong enough to kick up any listurbance

Cavill left the Sausalito when the boat rrived in midstream off Lime Point. He had as companions Adolph Kahn the high diver of the California Swimming club, and Prof. Killick, of the Sutro baths life saving crew. The tide was at a standstill, and the three men chose as a starting point for the swins mer a bunch of rocks about 100 yards north of Devil's Paint and a mile north of Lines Point. A selected crew from he Dolphin Boat club acted as escort n a whiteliall boat.

Cavillavore the regulation tights. He ipped into the water easily and naturby, and started for the San Francisco hore with energy, Killick and Kahn und the Doiphin crew accompanying dm in boats. The swimmer led off with long, easy, right-side stroke, and for he first few hundred yards of the ourse the way was easy and his pace as rapid. About a quarter of a mile rom shore the Australian encountered what he says was the swiftest current HE OWNER THOU

The title had turned since he left the cry, and was now pouring through the innuel with the speed of a mill race The ripples coared like a ministure se nd threatened to engulf the boats avill struck into it bravely, and atimplied to stay its progress by turn ring north. The rowers in the boat attempted similar tactics, but the rush of waters toward the ocean carried everything with it. Seeing that it was iseless to attempt to withstand the force of the tide Cavill drifted with it He was carried out almost to the Heads sefore he encountered the counterurrents on the Presidio shore. The ddy opposite Point Lobas caught him i its grip and whicled him back again oward the bay. From this time on avill's work was comparatively easy. He swam leisurely and easily toward the fort, followed by half a bundred anding point he picked up an old felt at that was floating in the water and

out it on his head, much to the amusement of the spectators. As he neared the shore Cavill in reased his speed. The Dolphin erew and a boat from the life-saving service leared the way. There was a long. low swell smushing against the rocks and on top of one of these breakers Cavill landed easly. There was a great crowd awaiting his arrival, and as the wimmer walked up the beach he was given an ovation by everything and verybody, from the small boy on the fort parapets to the hig whistless the teamer Sausalite. Cavill returned to the water almost immediately and swam to the Dolphin club's boat, from which

he was transferred to the Sausulito. Cavili's performance adds a new notch to the swimming record of the oast. The time spent in covering the listance is remarkably short, considering contrary tides and currents and the fact that he was carried aimost a mile out of his course. Throughout he wam on his right side, using a side

At the finish he was almost as fresh s when he started. The water was old, and when he touched shore after his long swim his right arm and leg vere benumbed to the point of use

The swimmer's physical dimensions re: Height, 5 feet to inches; weight, 180 ounds; chest measurement, til inches. cith the phenomenal expansion of e, inches. He is the son of Prof. Fred Cavill, of England, who swam across the English channel in 11 hours, mak g a world's record. San Francisco

America's Need of Cavalry. Discussing the possibilities of a war with England, and the strength of the United States militia or national guard ome of our new-papers lately boasted that an army of 100,000 men could be rrown into Canada within a few reks. How many of these men would mounted on horseback? It is a very sertinent inquiry, for it requires from three to six months' training to make a envalryman, and some of the states which furnish large contingents to the national guard have not a single troop of horses. If there is any lesson that the failure of the confederacy can teach us, it is this: that an invasion of Canada and I do not mean that such thing is in the least probable or de sirable - made without sufficient enval ry would be as barren of permanent results as it would be if made with an

#### n Century. Strong Again! New Life, New Streng. THE ANAPHRODISTIC!

rmy of crossbowmen.—Duncan Rose,

a PROF, OR, RICORD of Paris is the only a dy for restoring strength under guarantand will bring back your lost powers and for ever the dangerous orains on your em. Condory, Agt and Manager for U. S. A. 480 Quincy Bigs, Chinago, III. For sale only by Fred Schaefer, El Paso, Texas.

cannot persuade his invalid wife to obysicians because she very naturally dreads the inevitable examinations and "local treatments." He can o take Dr. Pierce's Favorite Prescrip tion. This truly wonderful medicine has cured nundreds of women after the best physician has failed. It has been in constant use and tested every day for 30 years. It isn't an experiment, there are no chances about it. best medical work ever prepared for the general public are invited to send 21 one cent stamps to cover cost of mailing only and receive a copy of Dr. Pierce's thousand page book, "Com-mon Sonse Medical Adviser." Address World's Dispensa v Medical Association, Buffalo, N. Y.

When most needed it is not unusual from home. Such was the experience of Mr. J. Y. Schenak, editor of the Caddo, Ind. Ter., Banner, when his little girl, two years of age, was threatened with a severe attack of croup He says: "My wife insisted that I go for the doctor, but as our family physician was out of town, I purchased a bottle of Chamberlain's Cough Remedy, which relieved her immediateley, I will not be without it in the future." 25 and 50 cent bottles for sale by all druggists.

#### THIRTEEN MONTHS IN A YEAR. A Proposition to Start in 1900 with; a

New Division of Time. It is suggested that on January 1900, a new division of the year into L months be instituted. It is claimed says the Scientific American, that this s not so prepesterous as most people would be likely to consider it at the uary 1 were, say Monday, every Monday would be the 1st, 8th, 15th and 22d; changes of the moon would be on about the same dates through the year, and many calculations, like interest, dates of maturing notes, Easter Sunday and many other important dates would be eration would have to figure new dates for birthdays and all legal holidays excost New Year would be on different lates, yet the gain would be more than the loss, as that would be permanent and the objections trifling.

The proposed change certainly has the merit of novelty, and it is just to say that the arguments in favor of the petric system on the ground of utility apply with considerable force in the resent case. We fear, however, that he objections on the grounds of senti ment, which are strong in the matter of weights and measures, would be even stronger against the proposed re ision of our methods of computing

The wife of Mr. D. Robinson, prominent lumberman of Hartwick, N. Y, was sick with rheumatism for five months. In speaking of it, Mr. Robinson says: "Chamberlain's Pain Balm is the only thing that gave her any rest from pain. For the relief of pain it cannot be beat." Many very bad cases of rheumatism have been cured by it. For sale at 50 cents per bottle by all druggists.

## Citation.

The State of Texas.

To the Sheriff or any Constable of El Paso County:—Greeting:

You are hereby commanded, That by making Publication of this Citation in some newspaper published in the County of El Paso, if there be a newspaper published in said county but if not, then in the nearest County where a newspaper is published.) for four weeks previous to the return day hereof, you summon L. L. Runyon, whose residence is unknown, to be and appear before the district court. at the next regular term thereof, to be holden in the County of El Paso, at the Court House thereof, in El Paso, Texas, on the first Monday in January, 1897, it being January 4, 1897, file number being 2532, then and there to answer the petition of Miliard Patterson, Plaintiff, lied in said court on the oth day of November A. D. 1898, against the said L. L. Runyon and alleging in substance as follows, to wit: That he, plaintiff, is the owner of lots number 14 and 15 in block number 273 according to the map of Campbell's addition to El Paso. Texas, in El Paso County, Texas. That he acquired title to said property through and by a conveyance from A. M. Loomis addition to El Paso. Texas, in El Paso County, Texas. That he acquired the absolute title to said property from said L. I., Runyon, by and through a deed executed by said L. L. Runyon by and through a deed executed by said L. L. Runyon by and through a deed executed by said L. L. Runyon as the laborate owner of said property. That at it c time said Runyon executed said deed to said Loomishe, the said Runyon, was the absolute owner of said property. That on the 2ard day of July, 1889, said Runyon acknowledged said instrument in form as the law regules before a United States Commissioner, an officer not authorized by law to take such acknowledgements. That plaintiff does not know what claim defendant now sets un to said property. That said deed of conveyance executed by said L. L. Runyon to said property and the to said real establishing his right and title to said real establishing his right a The State of Texas.

Assignee's Notice.

Et Paso, Texas, November 18, 1896,
Notice is hereby given that on November 17th, 1896, I was appointed assignee of the firm of H. Kayser & Co., of El Paso, Texas. I have qualified assuch assignee and entered into the discharge of my dutlet as such. All persons having claims against the said firm of H. Kayser & Co., who desire to accept the benefits of such assignment, are hereby requested to present their claims in the manner and time required by law.

All persons owing said firm are requested to call on me and settle their indebtedness at once.

BUFFALO, N. Y.

CUTTING OFF COREANS' PIGTAIL Great Grief Over an Edict of the Japanese Conquerors.

Rev. A. F. Moore, a missionary of the persuade her, if she needs persuasion, Presbyterian church for four years in been the unquestioned, exclusive propaccompanied by his family.

Some months ago the Japanese, who dictated the appointment of the Corean It is a certain cabinet, caused the Japanese police to and infallible cure for all derangements cut off the hair, or topknot, so called, of peculiar to women. Those who care to a great many Coreans. The topknots know all about it, and to receive the are a sign of distinction. They are worn only by married men, and no man is supposed to have properly asserted himself until he is married and has a

The cutting off of these appendages aused great grief. There were many remonstrances and increased dissatisfaction. However, things have so far improved now that an edict has gone for your family physician to be away forth allowing the Coreans to wear their topknots. The consequence is that many whose hair was cut off have collected it again and fastened it on, so that their happiness has been re established The gentleman says that many of the

Coreans are embracing Christianity. He says there is great disquiet in Corea. and that bands of dissatisfied natives are going about the country robbing and pillaging. Travelers are not safe. The king, whose consort was murdered over a year ago, is still at the Rus-

cause of this. A new palace is being built near the legation for the king. CHANGING SILVER INTO GOLD.

sian legation and largely under its con

trol. There is much dissatisfaction be-

A Chemical Test Which Has No Application to the Sixteen to One Theory. Prof. Emmons, one of the most skilled metallurgists in the country. first thought. If such a division were claims that in the reduction of silver made the first 12 months would have the molecules are so subdivided as to just 25 days, or four weeks each, and the differ so materially from that metal new month 29 to make 365, and 30 in that they can no longer be regarded as cap year. After a few days there would the same substance, but a new one, and se no need to refer to calendars, as the apparently the parent of both gold and same day of the week would have the silver, or the raw material out of which, same date through the year. If Jan- by a different arrangement of molecules, either gold or silver is constructed. Working on this theory, says every Tuesday the 2d, 9th, 16th and 23d, the Popular Science News, he finds that and so on throughout the year. The this new metallic substance can be aggregated into molecules of greater density than silver, and precisely corresponding with gold in color, in weight, so as to answer to every test of the United States mint as gold. In simplified. Although the present gen- fact, he says it is gold, though mannfactured from silver, of as much purity and value as that ever obtained in any other way. With further experiments on a large scale he expects that the process of manufacturing gold from silver will be very materially cheapened. At present he gets about four ounces of gold from six of silver. This

"He used to have. But he's lost me And it's positively distressing to read what he says because the two-cent stamp he recently bought to put on a etter to me didn't realize the usua dividend of five dollars."

Relation of Crime to Occupation.

Curious statistics concerning the reation of crime to occupation were brought forward at the recent meeting in Geneva of the Anthropological conrress. From these it appeared that in group of 10,000 farmers, 0.84 per cent. were criminals; in trades, I per cent.; in manufactures, 1.32 per cent.; in the professions, 2.30 per cent. One would suppose that professional people contributed a smaller proportion to the criminal classes than those in trades and manufactures, but it seems that men who live by their brains have greater opportunities for rascality than those who live by trade or handieraft The 2.30 per cent, of criminals in the professional class are thus distributed: Among 10,000 elergymen, 0.71 are criminals; among teachers, 1.58 per cent.; physicians, 1.86; chemists and apothe caries, 3,79; government employes, 7,15; diplomats, lawvers, notaries, and the like, 28.13. In these last three classes are found most of the poisoners, forgers, counterfeiters, embezzlers, swindlers and "genteel" thieves.

Archdeacon Sinelair, in his "Leaders of Thought, etc." tells a good story of an Eton bead master, known as "Flegging Keate." Finding one morning a row of boys in his study, he began, as usual, to flog them. They were too terrified at the awful iltile man to reimmstrate till he had gone half way down the row, when one plucked up courage to faiter out; "Piease, sir, we're not up for punishment we're a confirmation class!" "Never mind," said Dr. Keate; "I must be fair all around, the same thing to you 15 minutes ago, shed them off.

Chamberlain's Colic, Cholera and Diarrhoea Remedy, Major Picton says:
"I have used it myself and in my family for several years, and take pleasure in ble, harmless, painless, sure! Consticure for diarrhoea and dysentery. 1 always recommend it, and have frequently administered it to my guests in the hotel, and in every case it has proven itself worthy of unqualified endorsement."

MATCHBOXES FOR GIRLS. Another of Man's Prerogatives Seized

Upon by the New Woman. Until this year the matchbox has Seoul, Corea, arrived at San Francisco erry of man, says the New York Jouron the steamer Rio en routs for home, nal. Never once did he think of such a thing as the fairer sex borrowing it. He may have had a presentment of her

laying claim to his necktie, but his matchbox-never. But the bicycle girl, who makes whatever she wants possible, has now laid siege to man's matchbox. If she contemplates riding at night she needs matches to light her lamp, and neces-

arily she must carry them in a match-

That is the reason that there are any number of new matchboxes this year which are smaller and more dainty than mything in this line ever seen before. "Do girls buy them?" a prominent jeweler was asked. To which question he answered: "Yes, indeed. The smaller sizes are made particularly for their special use."

The prettiest of the new matchboxes for girls are of gold with an enameled decoration. The enameling either takes the form of a college or vacht clui flag or it resembles a hand-painted miniature showing a girl on a wheel or Kansas City. the head of a dog. Many of these match boxes are made with a concealed recess for a photograph. It is only when a certain spring is touched that the pic ture can be seen, so skillfully is it hidden away.

The silver matchboxes, decorated with the outline of a tiny bicycle in namel, are also new and much less ex pensive.

#### HE RESIGNED.

How the Postmaster at Pony Closed Up His Accounts.

In the early days of Pony, a mining amp in Montana, the post office con sisted of an old tea-box, into which al he letters were dumped, the citizens helping themselves, says an exchange. There were only 40 citizens in Pony, and, there being no money in the office. was with considerable difficulty that the storekeeper was persuaded to accept the postmastership.

One day a stranger rode into camp

and called on the postmaster.
"Don't you know," he began, sternly. that it is illegal to allow people to pick out their own letters like that?"

"Waal, stranger," said the postmas ter, "I don't know that it is any of your ousiness how this office is run. "But I am a United States post office

"In this case," said the postmaster. we will finish up this post office right

He took the tea-box, placed it in the diddle of the road and, with a good un, kicked it clear across the gulch. "Now, then," he resumed, "you go ight back to Washington and tell the legartment for me that the accounts are closed and the postmaster at Pony has resigned."

## SUBMARINE SENTINEL.

successful Test of a New Apparatus

France. The "submarine sentinel" is the par f a new apparatus which has quite re ently been experimented with by th French navy. The final tests were made in San Juan bay by a special commis ion, consisting of Capt. Fort, com-Magenta; Lieut. Serres, the adjutant of Admiral Gervais, and a number of officers from the French Mediterranea squadron. The apparatus, which was operated from the torpedo boat Sar rizin, succeeded in exploding two auto matic torpedoes which had previously been placed in the channel of naviga tion, but without the knowledge of the commander of the Sarrizin. The sucressful result of this official test has been submitted to the French minister of marine and the adoption of the sub marine sentinel by the French navy was trongly recommended by the commis ion to the higher authorities. In the report Capt. Fort stated that it was the only apparatus so far known offer ing the a cantage of being able to clear the bottom of channels of hostile wa ters from explosive obstructions placed herein by the enemy. Details of the construction of the new apparatus are carefully withheld from the public.

## HE PUT UP A GRAVESTONE. But the Epitaph of Grief Soon Got a

Second Edition. Did you hear the story, asks the Cin innati Commercial Gazette, of the man who lost his wife and put up a tomb stone to her memory, and had carved thereon in large letters: "The Light of My Life Has Gone Out?"

Well (as usual), about three months after she had defuncted, he took it into his head to marry another girl, and went to see a minister about uniting them in galling and terrifically expen sive bonds of matrimony. The parso xpressed himself as being quite will ing to perform the operation, but re narked that the inscription he has daced on his first wife's tombston hight prove somewhat embarrassing

"Ah, yes, I remember that," remarks the ex-mourner. "Let me see, I said The light of my life has gone out fidn't 1? Well, I'll soon fix that There's lots of room underneath, as I'll just have the monument man pu there: But I have struck anothe

Both in the Same Plight Some years ago I was in camp with: friend of mine in Canada. Toward morning I awoke shivering with cold The fire was very low. My companie was sound asleep. It isn't nice to ge out of a warm blanket to haul frost logs to the fire, so I gave Wyndham a kick, and then pretended to be asleep There was no response, and by and be I tried another kick. Then the of secondred burst out laughing. "I did PANOS AND ORGANS IN THE WORLD, and it will do you good." So he fin- he said: "that's how you came to wake 3319.

Major C. T. Picton is manager of the State Hotel, at Denison Texas, which To fill with terror all the night; the traveling men say is one of the best That stalk abroad in hideous dream notels in the section. In speaking of With which dyspepsia's fancy teems,

saying that I consider it an infallible pation, biliousness, sick beadache indigestion; all vanish with their use.
